

Market Plus Guide

Myket has implemented the Market Plus Plan with the goal of increasing its revenue and developers. Market Plus allows users to download paid apps for free by purchasing monthly subscriptions. Users of Market Plus also benefit from other features such as discounts when purchasing paid apps, charging more Myket wallets, using discount codes for authenticated online stores, and more. Due to the relative popularity of the plan, Myket has also made it possible for developers to participate in Market Plus.

Terms of participation:

- The amount of revenue per app will be based on the free download rate of the app. Increasing the free download rate will increase the developer's income incrementally.
- The apps will be in one of the steps based on download rates in Market Plus plan.
- If the app price is fewer than the basic price that listed in the table below, the basis for calculating the step is the app price.
- The Market Plus settlement will be settled with the end of the month developer's settlement.
- the basis for calculating is each step price app on it by downloads rate. developer earning is multiplied app price by an app download number.

How to earn money by Market Plus:

If the basic price is Criterion for calculation, the method of monthly income calculation will be based on this table:

Developer's maximum monthly earnings (toman)	Developer's minimum monthly earnings (toman)	Basic price of each download (toman)	The number of free app downloads by the user in a month
30,000	300	300	1-100
300,000	60,600	600	101-500
900,000	450,900	900	501-1000
6,000,000	1,201,200	1200	1001-5000
15,000,000	7,501,500	1500	5001-10000
170,000,000	17,001,700	1700	10001-100000
	170,002,000	2000	Higher than 100000
